PROFESSIONAL SUMMARY

Frontend Engineer with 8+ years of experience building scalable web applications in multi-market environments. Specialized in React, TypeScript, SEO, performance optimization, and platform engineering to improve user engagement and delivery efficiency.

CORE SKILLS

React, Angular, JavaScript, TypeScript, HTML, CSS, Styled-components, Tailwind CSS, state management, scalable frontend architecture, design systems, Core Web Vitals (LCP, CLS, TBT, FCP), technical SEO, Lighthouse, Sitespeed, Jest, React Testing Library, Cypress, CI/CD, Jenkins, GitLab CI, Git, GitHub, GitLab, REST APIs, AWS.

EXPERIENCE

OLX Group | Frontend Engineer

Jun 2021 – Present

Discovery Experience (Nov 2025 – Present)

- Build and enhance multi-market vehicle discovery experiences, with focus on search and filtering used by millions of users.
- Implement advanced filter state management and responsive interfaces to improve findability, engagement, and SEO outcomes.

Core Platform (Feb 2025 – Oct 2025)

- Improved frontend architecture, performance, and reliability to support scale across multiple teams and markets.
- Enhanced developer experience through resilient platform capabilities and modern CI/CD workflows.

Buyer Experience (Nov 2023 – Feb 2025)

- Delivered buyer-facing features that improved engagement, UX, and transaction safety across key journeys.
- Partnered with product and design to ship high-impact iterations that supported user and business growth.

SEO, Performance & Account Platform (Jun 2021 – Nov 2023)

- Improved technical SEO and Core Web Vitals (FCP, LCP, CLS, TBT) using Lighthouse and Sitespeed.
- Developed CIAM-related account capabilities to support secure, seamless user experiences across OLX platforms.

Additional Contributions

- Led the OLX Women Workshop (2023), mentoring university trainees in frontend development.
- Managed the Frontend Guild, organizing monthly engineering knowledge-sharing sessions.

Metyis | Frontend Engineer

2021

Contributed to e-commerce and IoT web applications in cross-functional delivery teams.

Talkdesk | Frontend Engineer

2019 – 2021

Built features for workforce engagement management and speech analytics products.

Critical Software | Frontend Engineer

2018 – 2019

Developed frontend features for an internal platform supporting company process management.

Enso Origins | Software Engineer

2017

Contributed to web applications for school energy-saving initiatives and internal financial control.

EDUCATION

Instituto Superior de Engenharia de Coimbra

Bachelor's Degree in Computer Engineering (Information Systems)

2014 – 2017
